

## PRODUCT INFORMATION

### PrimeBoard XTreme – REHAU-Edge Recommendation

Edges are functional components in modern furniture construction and combine design-related and protective functions. Matched to the current collection in terms of colour, surface structure and gloss level, they ensure a uniform overall appearance and a consistent visual integration of the furniture components.

In addition to their functional appearance, edges provide reliable protection of cut surfaces against moisture, impacts and mechanical stress, thereby contributing to an extended service life of the furniture. This is particularly relevant in frequently used applications such as kitchens, bathrooms or contract furniture. Closed edges and defined transitions result in a precise and professional appearance.

High-quality ABS edges are characterised by dimensional stability, ease of maintenance and resistance to moisture. They support a clear and contemporary design concept while allowing for individual design solutions. Overall, edge materials contribute to surface protection and functional durability in daily use.

A decor-identical edge material range, corresponding to the PrimeBoard XTreme collection, is available directly via our partner REHAU Industries SE & Co. KG. Further information is available at:
