WOOD-BASED PANELS
THAT OPEN UP NEW PERSPECTIVES.

From design to completed projects, every step counts. After all, designs are only really appealing if they can be achieved. By choosing Pfleiderer, you're off to the right start. Aesthetic, functional and the perfect design solution. In the 2021–2024 brochure, we introduce you to our extensive product range designed to make you more successful. Stylish, expressive and modern decors, innovative surface textures and core panels all come together perfectly to meet your technical, cost and user requirements. From high quality individual items to sector spanning concepts – you can turn your vision into reality with practical, high quality solutions from Pfleiderer.

A modern, multi-story building with a facade of large, rectangular panels in shades of brown and black. The building has large glass windows and doors. In the foreground, there is a swimming pool with a blue surface, and a patio area with a red beanbag chair and a grey beanbag chair. The sky is clear and blue.

**NOT JUST A
SURFACE**

**ROBUST
AESTHETIC**

**LOW-MAINTENANCE
SUSTAINABILITY**

**COMPACT FAÇADE PANELS:
FOR PERFECT REAR-VENTILATED
CURTAIN FAÇADES!**

The quality of a façade is a result of the interplay of the façade system and the material. Due to the structural separation of the outer layer, the insulation and the rear-ventilation space, a rear-ventilated curtain façade achieves physical advantages that are optimally supplemented by Duropal XTerior compact façade panels. Good moisture protection, sound insulation and a high energy efficiency all combined with a unique selection of decors and colours suitable for a long service life. The complete system is also easy to dismantle, individual panels can be replaced without difficulty when necessary. The result is façade solutions that impress right down the line in terms of their aesthetics and function.

ROBUST

NATURALLY ROBUST: PROTECTION THAT IS PLAIN TO SEE.

The façade is the most important protective casing that a building has against all external influences. The more reliably it protects the building from moisture, sunlight and physical impact, the better. Pfleiderer façade panels consist of highly robust high-pressure laminate with a homogeneously coloured core and a single- or double-sided weather-resistant functional layer. In addition, a rear-ventilated curtain façade supports a permeable façade structure and thus the transfer of the moisture to the outside.

PERFECTLY EQUIPPED TO DEFY THE ELEMENTS

First choice from the point of view of the building physics

A rear-ventilated curtain façade – combined with the right façade material – offers a number of advantages. It provides optimal moisture protection by allowing rain, hail or snow to simply roll off it, without inhibiting the natural air circulation on the surface of the building. Almost any desired heat insulation can be integrated into its multi-layered structure, contributing to a good energy efficiency of the building. When compact panels such as Duropal XTerior compact are used, their density and composition means that the noise generated by driving rain is low in comparison with other materials, e.g. metal.

Also with fire safety properties

In the form of Duropal XTerior compact F, there is also an 8 mm-thick flame-retardant variant, which has the fire rating B-s1, d0 in accordance with EN13501-1 and is particularly suitable for use in façades up to building class 5 in the public sphere.

UV protection built in

The sun is a cause of wear for façade materials that should not be underestimated. Therefore, it is good to know that Duropal XTerior compact is extremely UV-resistant. This applies both to the integrity of the material itself and to the colour fastness of the decors. This ensures that both the building physics and the visual appearance permanently meet the requirements that are placed upon them.

A modern building facade featuring a combination of dark grey rectangular panels and vertical wood-textured panels. The building has a multi-level design with a covered outdoor area. In the foreground, there is a small garden with green plants, a yellow metal table and chairs, and concrete steps leading up to the entrance. The sky is blue with some clouds.

AESTHETIC

SOPHISTICATED EYE-CATCHER: FAÇADE PANELS WITH DESIGN FREEDOM.

Harmonious, rich in contrast or accented. With a uniquely wide-ranging selection of decors, Duropal XTerior compact provides almost unlimited freedom of design. The material is available in stylistically confident plain colours and realistic wood and stone decors. Duropal XTerior compact is also equipped with the matt surface texture Exterior Matt. With its velvety finish, it creates an extremely high-quality look that makes façades into fascinating eye-catchers from any angle and in all weathers!

STYLISTICALLY CONFIDENT AND QUICKLY REALISED.

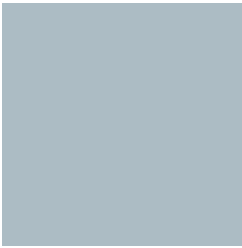

FOR IDEAS THAT INSPIRE.

Wide selection of decors from stock

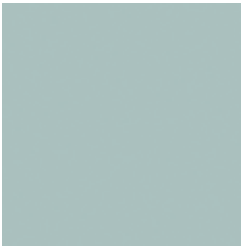

Duropol XTerior compact is available at short notice from stock in 34 stylistically confident plain colours as well as high-quality stone and wood decors. This ensures that design ideas can be realised quickly and reliably.

Delivery times

The product variants in stock are available from the dealer in 72 working hours (depending on the daily route).

COMPLETE SELECTION:
DRAWING FROM UNLIMITED AESTHETIC RESOURCES.

Uniquely varied

Duropol XTerior compact brings unlimited design possibilities to façade design. More than 170 decors from the full collection can be delivered. In this way, Pfleiderer provides the optimal basis for the precise realisation of colour concepts – from a harmonious overall design to individual contrasting highlights and the showcasing of materiality, through to the accentuation of the structure of parts of buildings or ensembles.

COMPLETE COLLECTION

Product	Format	Surface texture	Reaction to fire
Duropol XTerior compact F	2,800 x 2,070 x 8/10/12/13 mm	EM/MP	flame retardant
Duropol XTerior compact	2,800 x 2,070 x 6/8/10/12/13 mm	EM/VV, EM/EM	normally flammable

Fascinating surface with an anti-fingerprint effect

The surface texture Exterior Matt (EM) gives Duropol XTerior compact/Duropol XTerior compact F a particularly attractive look. The delicate grain gives the surface a velvety appearance and yet still reflects the light. The resulting shimmer has a high-quality effect and harmoniously enhances the decor and shape at any angle of light incidence. Exterior Matt also delights people with its anti-fingerprint effect and a low-maintenance finish whose appearance leaves an excellent impression even after many years.

You can find the complete Duropol XTerior compact collection online in the decor finder at [pfleiderer.com/facade-panels](https://www.pfleiderer.com/facade-panels)

LOW-MAINTENANCE

TIMELESSLY ATTRACTIVE: THE PERFECT MATERIAL FOR FAÇADE

The façade plays a decisive role in shaping people's first impression of a building. Whether it always presents itself in the best light is a question of the right material. Pfleiderer façade panels provide the best conditions for this. Thanks to their functional surface, it is easy to remove graffiti and dirt and they are resistant to fingerprints.

SIMPLY WELL THOUGHT OUT: ATTRACTIVE FAÇADE, EASY TO CARE FOR.

Low-maintenance surface

Pfleiderer façade panels have a surface on which impurities are hardly able to take hold. It can be cleaned reliably and quickly. Especially in the case of public buildings, in an urban environment and where there is intensive use, the appearance of façades is jeopardised by vandalism and wear, amongst other things. Thanks to the special surface technology, impurities or graffiti can be removed from the Duropal XTerior compact façade panel without residue. Thanks to the anti-fingerprint effect, Pfleiderer façade panels are also resistant to fingerprints.

SUSTAINABILITY

SMART BUILDING: CONSERVING RESOURCES WITH FAÇADES.

Nowadays, sustainability plays an important role in every construction project. Rear-ventilated curtain façades with the Duropal XTerior compact façade panel can make a decisive contribution towards reducing the environmental footprint and making buildings more resource-efficient.

FUTURE-PROOF AND LONG LASTING WITH RECYCLING IN MIND.

The first choice in perpetuity

The timeless design possibilities and the low-maintenance finish of Pfleiderer façade panels improves the economic efficiency and sustainability. As Duropal XTerior compact panels never go out of fashion and lose none of their attractiveness, they do not require replacement or post-treatment even after years.

Fully recyclable and dismantlable

Thanks to comprehensive material concepts and product life cycle models, Pfleiderer façade panels can be given full consideration with respect to their reusability in sustainability concepts in the context of building planning. At the end of the primary period of use or in the event of renovations, they can be dismantled with little effort and sorted by material. Thermal recycling is also possible.

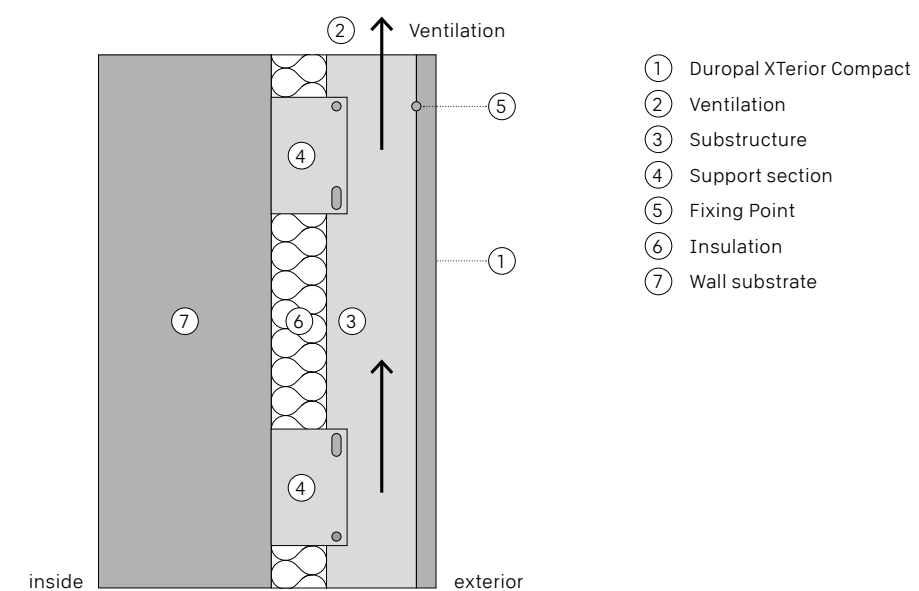

PROTECTION AND BEAUTY IN PERFECT UNISON

SYSTEMATICALLY BETTER: REAR-VENTILATED CURTAIN FAÇADES.

The rear-ventilated curtain façade sets standards for intelligent, sustainable construction. With Duropal XTerior compact / Duropal XTerior compact F as the building envelope, a façade system is created with advantages that impress all down the line:

- **Weather-resistant:** excellent protection against weather conditions such as rain, snow and wind
- **Robust:** very durable, low-maintenance
- **Cost-effective:** due to the high durability of the façade, low maintenance costs and a potentially high degree of prefabrication
- **Energy-efficient:** rear-ventilation space and high insulation cross-sections provide powerful advantages in terms of the building physics
- **Decorative variety:** the large variety of decors in the Pfleiderer Duropal XTerior compact / Duropal XTerior compact F collection makes a colour match between the façade and the interior design product possible.

The structure in detail: rear-ventilated curtain façade, with installation space, formwork

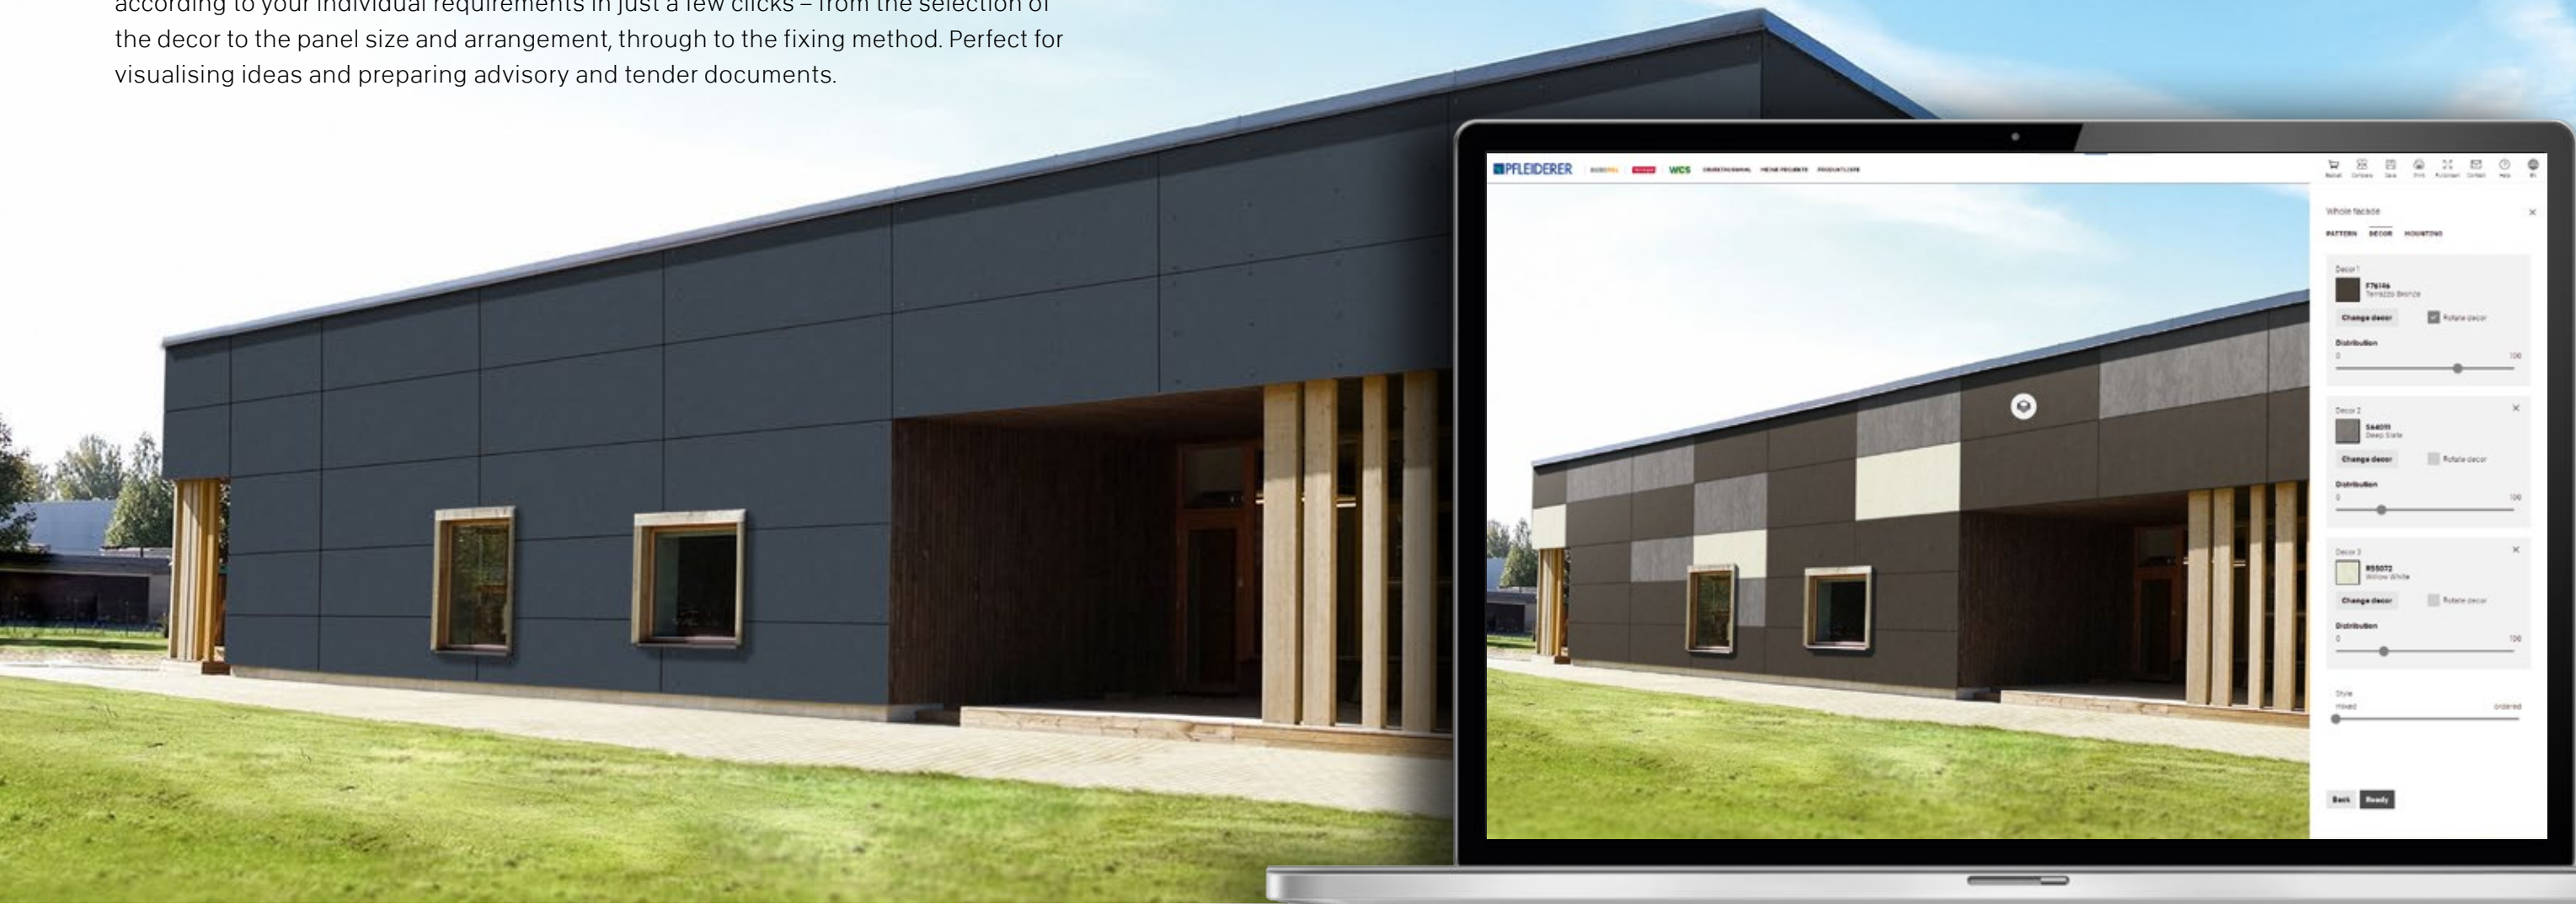

IMPRESSIVELY VIVID: THE PFLEIDERER FAÇADE CONFIGURATOR

The Pfleiderer façade configurator is available for exploring the design options with Duropal XTerior compact façade panels. Here you can rework different types of buildings according to your individual requirements in just a few clicks – from the selection of the decor to the panel size and arrangement, through to the fixing method. Perfect for visualising ideas and preparing advisory and tender documents.

Detached house

Multi-storey residential building

Accommodation and food service

Office and education

Industrial building

Balconies and parapets

You can find further examples of the use of Pfleiderer panels for the façade design of different types of buildings on the following pages.

DETACHED HOUSE

CUSTOMISED MEETS PRACTICAL: A HOME WITH PERSONALITY.

Whether they are installed when the building is first built or as part of a modernisation, Duropal XTerior compact façade panels give your home just the appearance that home-owners want. Thanks to the uniquely wide range of plain decors, colour concepts can be realised accurately and also combined with wood or stone decors on request. As a rear-ventilated façade, the Pfleiderer façade panels can also score points with a long service life with low maintenance requirements.

MULTI-STOREY RESIDENTIAL BUILDING

SMARTER LIVING: FAÇADE SYSTEMS WITH ADDED VALUE.

In multi-storey residential buildings, economic efficiency and building physics are gaining in significance alongside with visual appearance. It is important to reconcile insulating properties, weather protection and fire safety properties with ease of handling, durability and quality of life. Duropal XTerior compact F as part of a rear-ventilated curtain façade is perfect for this.

ACCOMMO- DATION AND FOOD SERVICE

STYLISTICALLY CONFIDENT CONCEPTS FOR CONSTRUCTED HOSPITALITY.

Restaurants and hotels also want to delight their guests visually. It is not only important that the external appearance is aesthetically right. The durability and the associated economic factors must be taken into consideration. Thanks to its dirt-resistant and low-maintenance surface, Duropol XTerior compact panels give an unmistakably distinguished look for the long term!

OFFICE AND EDUCATION

LEAVES AN IMPRESSION: CONCEPTS FOR AN INVITING ENVIRONMENT.

Educational institutions and places of work are highly frequented places where people spend a lot of time. Therefore, they should not only be functionally appealing, but should also express appreciation through their aesthetics – ideally right from the long-distance effect of the façade. Duropal XTerior compact panels ensure that buildings such as offices, schools or nurseries stand out visually and remain attractive even after intensive daily use for years.

INDUSTRIAL BUILDING

PROTECTS VALUES. AND CREATES IDENTITY.

In commercial and industrial buildings, the focus is on functionality and economic efficiency. For many companies, buildings are an expression of the organisations own identity. Pfleiderer façade panels are perfect for this as they can be mounted on a variety of substructures, such as aluminium, steel or wood, and provide high-quality protection and an accurate realisation of design guidelines with their wide range of decors.

BALCONIES AND PARAPETS

COHERENT DESIGN SEAMLESS IN EVERY DETAIL.

Another area of application for Duopal XTerior compact panels is balconies and parapets. Especially in multi-storey residential buildings, they enable balconies to blend perfectly into the appearance of the building – or to be highlighted as contrasting elements on request. In either case, the overall design benefits from the consistent appearance of the unique Exterior Matt texture.

DECORATIVE PANELS LACQUERED BOARDS

Duropol XTerior compact

Compact high-pressure laminate for outdoor use in standard quality according to EN 438-6:EDS / intensive decors according to EN 438-6:EGS. With uniform black-coloured core and single-sided decorative acrylic lacquer on the top side and decorative melamine resin surface on the reverse or double-sided decorative acrylic lacquer.

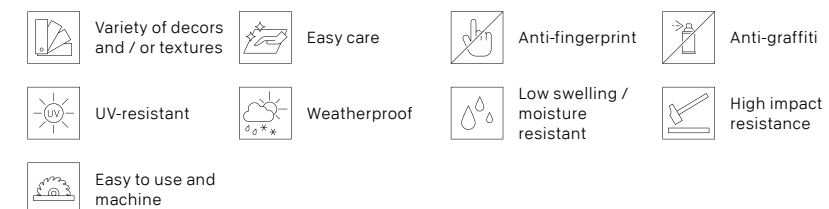

AREAS OF APPLICATION

Exterior use

Duropol XTerior compact fulfils the highest UV resistance requirements for the surface and due to its high mechanical strength values and design freedom, it is suitable for outdoor use, e.g. as facade, garden furniture, privacy screens, roof undersides, balconies or playground equipment. Especially if high standards of robustness, weather resistance and easy cleaning are required.

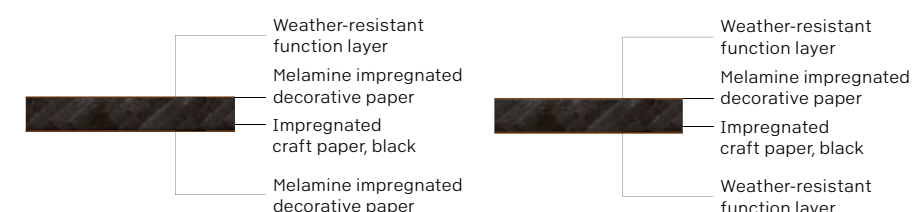

PRODUCT FEATURES

Product standard	EN 438-6
Reaction to fire	Normally flammable D-s2,d0 (EN 13501-1, CWFT acc. to 2003/593/EG)
EC scope	EN 438-7:2005 Compact laminate panels/sidings for exterior wall and ceiling finishes (including suspended ceilings)
Formaldehyde emission class	E1 E05
Density	Min. 1,350 kg/m³ (EN ISO 1183-1)
Note	FSC certification or PEFC certification available on request.

FORMAT IN MM

UNCOMPROMISINGLY GOOD: AT PFLEIDERER QUALITY HAS A SYSTEM.

You can rely on security and transparency

Producing wood-based materials sustainably and in the highest quality is a challenge. As a leading company in the wood industry, Pfleiderer faces up to this challenge at all levels – and with traditional entrepreneurial diligence. With modern production sites, an integrated management system for quality, environment, energy and safety, and a corporate culture that continuously develops these values. Because for us, the compatibility of quality and sustainability is a matter of course!

In concrete terms, this means that we certify our processes throughout the entire value chain – often far beyond what is legally required. We attach great importance to being as transparent as possible for our customers and partners. Our environmental management systems at our locations are certified according to DIN ISO EN 14001 and ISO 50001. Also we belong to the Quality Association for Wood-based Panels and have certifications according to FSC® (License Code: FSC® C011773) and PEFC (License Code: PEFC/04-32-0828). And if you want to know more, just contact us. We will be happy to give you detailed information!

MADE IN GERMANY

SUSTAIN- ABILITY

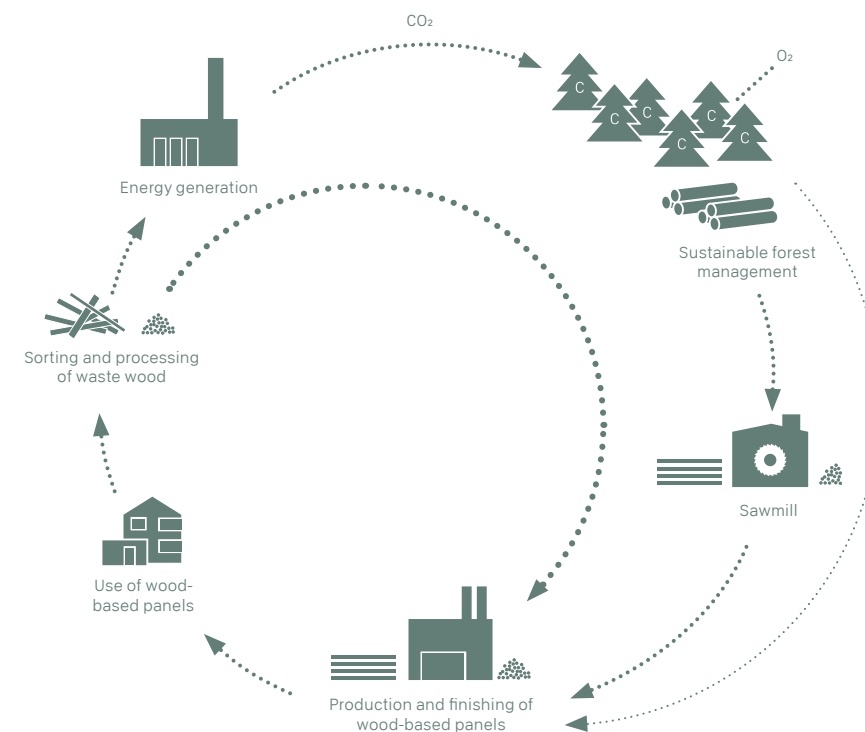

DESIGNED FOR A FUTURE WORTH LIVING: SUSTAINABILITY AT PFLEIDERER

Responsibility for tomorrow starts today.

Those who rely on wood as a raw material rightly expect an environmentally conscious “green” material. We at Pfleiderer want to do full justice to this and have therefore been offering an extensive range of low-emission and environmentally friendly products for many years. Sustainability – in addition to ecological, social and economic aspects – as well as careful use of natural resources are permanent pillars of our corporate philosophy. Consistent recycling management and wood recycling ensure that no trees are felled for our products. Through regular independent evaluation of our procurement and production processes, we are able to ensure that we are able to offer our customers the best possible service, manufacturing and logistics processes as well as a corporate culture of accountability. We ensure that you can use our products with a clear conscience and recommend them to your customers.

A healthy full range of products.

Pfleiderer focuses on low-emission materials, e. g. F**** glued panels for interior design or Living-Board with formaldehyde-free gluing. Many of our board materials have been awarded the Blue Angel for a healthy indoor climate for many years. At the beginning of 2020, we succeeded in obtaining this award – in addition to raw boards and directly coated products – also for large parts of the HPL range. This means that you can also fall back on a consistently sustainable full product range for demanding projects – and fulfil customer wishes without compromising on ecology and sustainability.

Through multi-stage wood utilisation (so-called cascade utilisation), wood recycling, and the use of forestry wood and industrial waste wood for high quality materials with a long service life, Pfleiderer conserves valuable resources and actively contributes to reducing carbon emissions, air, water and soil pollution as well as the reduction of energy consumption. We control the wood mix individually, depending on the product, to achieve a perfect balance between quality requirements and resource conservation.

**ALWAYS THERE,

Suitable concepts for any area of application

Every sector follows its own rules – including when it comes to the wood-based panels used. To create real added value, the aesthetics, workability and functionality must be right. This is the principle of the Pfleiderer areas of application. We will present bundles of sector-specific product and material solutions to you that will enable you to meet the challenges that you face – from furniture construction and interior design to external applications and building construction.

You can simply download the brochures via a QR code and on **pfleiderer.com** or order them via the sample shop.

DIGITAL TOOLS

ILLUSTRATIVE AND RESULTS-DRIVEN: DIGITAL SERVICES FROM PFLEIDERER.

The digital world has even opened up new possibilities and advantages when working with woodbased panels. Pfleiderer offers its partners a wide range of tools that make selecting, designing, planning, visualising and realising projects significantly easier. Find out about our digital services – you'll never want to be without them again.

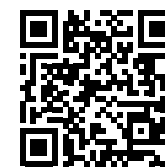

WorkApp

workapp.pfleiderer.com

The quickest way to find the answers to all your decor-related questions: simply open the DecorScanner on your smartphone, scan the decor, view detailed information straight away on your phone, receive combination recommendations and request the matching sample directly from the app, if required. It is compatible with all smartphones and, of course, you can also easily add the app to your home screen.

Digital Product Finder

productfinder.pfleiderer.com

Which decorative panel is best suited to which application? Which product has particular material properties or surface characteristics? What is available quickly? Use the digital productfinder to find the perfect material for your application in just a few steps. After all, bringing together creative ideas with construction requirements is what Pfleiderer does best!

Façade Configurator

pfleiderer.com/facade-configurator

To get to know the design options with our Duropal XTerior compact panels in more detail, we offer a façade configurator. Here you can visualise colour concepts, installation options, substrates as well as panel formats and combinations for a variety of application areas. Try it out and see our almost unlimited design possibilities for yourself.

Room Designer

roomdesigner.pfleiderer.com

Combine all the decor collections in 26 different digital room layouts – and show your customers in advance how bespoke design options could look in their home, health or care setting, office, hotel, shop, caravan or yacht. Easy to use, with detailed decor lists and smart filters as well as an interactive compare function. You can print and download the results or save them as favourites.

Moodboard Tool

moods.pfleiderer.com

Get the first glimpse of your desired decor before you order! Just upload your own image to our Moodboard Tool. The tool extracts the colours from your motif and suggests suitable decors from our portfolio. You can then save your created Moodboard in your account or send it via e-mail in order to discuss the selection further.

3D-Viewer

3d-viewer.pfleiderer.com

In order to properly evaluate a surface texture, you have to be able to see it from different angles. That's why we provide the 3D VIEWER for surface textures! It enables you to get a realistic 360-degree view of our surface textures from all sides and in different lighting conditions. A useful tool for everyone who appreciates quick and illustrative support when evaluating and deciding on different textures!

Individual Configurator

individual.pfleiderer.com

The idea behind Pfleiderer's individual design concept is to enable almost unlimited creative freedom starting from a lot size of one. It allows you to use your own motifs – without compromising on the quality of the surface or core materials. You can use the Individual Product Finder to configure your unique product easily online, from selecting the core material to uploading your motif and enquiring about production.
