**WOOD CONSTRUCTION SYSTEMS:
TECHNOLOGICALLY PIONEERING –
CONSISTENTLY CLIMATE-FRIENDLY**

Under Wood Construction Systems (WCS), Pfleiderer bundles its innovative solutions for construction applications: Materials that meet the special requirements in timber and formwork construction along with storage and packaging applications – including sustainable raw material concepts and environmentally and climate-conscious production processes.

SUSTAIN- ABILITY

WE ARE COMMITTED TO THE UNITED NATIONS GLOBAL COMPACT

Those who rely on wood as a raw material rightly expect an environmentally conscious “green” material. At Pfeleiderer we want to do full justice, to this to commodity, therefore been offering an extensive range of low-emission and environmentally friendly products for many years. Sustainability – in addition to ecological, social and economic aspects – as well as the careful use of natural resources are permanent pillars of our corporate philosophy. Consistent circular economy and wood recycling at the highest technological level as well as independent evaluation of our procurement, production and logistics processes ensure that we optimally harmonise qualitative our ecological requirements ensuring that we offer our customers the best possible service, manufacturing and logistics processes as well as a corporate culture of accountability. We ensure that you can use our products with a clear conscience and recommend them to your customers.

STORAGE TECHNOLOGY

High-performance to withstand the tough everyday challenges in the logistics area.

PACKAGING CONSTRUCTION

So that everything gets from A to B safely

CONSTRUCTION SOLUTIONS, FORWARD THINKING: WCS – A UNIQUE FUTURE PROOF MATERIAL CONCEPT

Construction applications place high demands on the materials used, e.g. in terms of bending strength, static properties, thickness swelling, airborne sound insulation or even burn-off rate. Pfleiderer engineered wood products offer the right board for almost every application – with high-quality technical properties, made from sustainable raw materials, consistently produced in an environmentally friendly and climate-friendly manner.

CONCRETE FORMWORK

The best that can happen to concrete

TIMBER CONSTRUCTION

First choice for future-oriented construction

QUALITY

PRECISION AS A PRINCIPLE: **MADE IN GERMANY**

Pfleiderer is addressing the challenge of manufacturing top-quality wood-based materials with its traditional, meticulous approach to doing business. With integrated quality, environmental, energy and safety management systems, a corporate culture that is based on its values and independent certification audits along the entire value creation chain. With environmental management systems that are certified according to ISO EN 14001 and ISO 50001, certifications according to FSC® (license code: FSC® C011773) and PEFC (license code: PEFC/04-32-0828), and also as a member of Qualitäts-gemeinschaft Holzwerkstoffe, the German association of high-quality wood-based material manufacturers, we illustrate how much we value transparency for our customers and partners.

MADE IN GERMANY

PIONEERING DETERMINATION **A BRAND WITH TRADITION**

Pfleiderer sets new standards when it comes to high-quality engineered wood materials with a particular focus on decorative products for furniture and interior design, exterior uses and proven structural wood construction solutions. Over 125 years of experience with the renewable wood material and a corporate philosophy that focuses strictly on sustainability make us the first choice for all trades, retailers, architects and planners who are looking for reliable solutions with groundbreaking added functional values to realise their ideas. As a German Standards "Brand of the Century" company, our standards and our commitment to quality and customer-orientation are particularly important to us.

SERVICE

STRONGER TOGETHER: FROM THE IDEA TO DELIVERY

Considered products provide the basis for us. However we support our partners far beyond that. Providing tailor-made solutions, making it easy for you to find the exact solution to meet your needs.

TAILOR-MADE CONCEPTS: FOR YOUR AREA OF APPLICATION

Every industry follows its own rules – and this also applies to the wood-based materials. To ensure that real added value is created, sustainability, processability and functionality must be right. We present you with industry-specific bundled product and material solutions that will help you to overcome your challenges!

TIMBER CONSTRUCTION

First choice for future-focused construction

Wood is in demand in the construction industry more than ever before. No wonder, because wood-based materials can reconcile requirements relating to sustainability and structural requirements in a unique way. When it comes to buildings that promote healthy living while saving resources, Pfleiderer sets new standards. Our low-emission products create a healthy living environment and play their part in climate protection by actively binding CO2. At the same time, their high quality and extensive test certificates ensure that future-oriented concepts can be reliably turned into reality in residential and commercial projects.

TIMBER CONSTRUCTION PARTICLEBOARDS

LivingBoard face contiprotect P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

LivingBoard face P5 (sanded board) and LivingBoard face contiprotect P5 (unsanded board) are suitable for all areas of use, in which high load bearing values, moisture resistance and simultaneous formaldehyde-free bonding are important. LivingBoard face contiprotect P5 with its unsanded contiprotect surface offers significantly delayed moisture absorption. The high dimensional accuracy of the tongue-and-groove joint guarantees an optimum fit and level, flush laying.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in humid conditions
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	Refer to price list for minimum order quantities. Other formats and thicknesses on request.

FORMAT IN MM		
Length	Width	Thickness
2,500	1,250	12 15 18 22 25
2,650 2,800 3,000 3,200	1,250	15
3,000	2,500	15
5,040	2,580	12 15 18 22 25

Length	Width	12	15	18	22	25
2,510	635	60	50	40	35	32
2,510	1,260	60	50	40	35	32

LivingBoard face contiprotect P7

Wood particleboard type P7 in accordance with EN 312, heavy-duty, for structural purposes for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

LivingBoard face P7 (sanded board) and LivingBoard face contiprotect P7(unsanded board) are suitable for all areas of use, in which high load bearing values, moisture resistance and simultaneous formaldehyde-free bonding are important. LivingBoard face contiprotect P7 with its unsanded contiprotect surface offers significantly delayed moisture absorption.

PRODUCT FEATURES

Product-type	P7
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Heavy duty load-bearing boards for use in humid conditions.
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	From a minimum order quantity of 70 m³. Other formats and thicknesses available on request.

FORMAT IN MM

2,510	635	35

PremiumBoard MFP Living P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

This multifunctional wood-based material containing a high proportion of recycled wood is characterised by high bending strength and transverse tensile strength in the longitudinal and transverse direction and high moisture resistance. This is achieved due to randomly scattered wood particles and high-quality formaldehyde-free gluing. It is therefore perfect for a wide range of building uses, as well as the construction of stable packaging.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in humid conditions
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.

2,500	615	60	50	40	35	32

LivingBoard P4

Wood particleboard Type P4 conforming to EN 312, for load-bearing use in dry conditions, 100 % formaldehyde-free glued.

AREAS OF APPLICATION

For those who need a true all-rounder in ecological timber construction and appreciate healthy living products, there is nothing like LivingBoard P4. This panel keeps its promises and is recommended as an ecological construction product for healthy living. Pure nature for greater quality of life.

PRODUCT FEATURES

Product-type	P4
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in dry conditions.
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	From a minimum order quantity of 70 m³. Other formats and thicknesses available on request.

FORMAT IN MM

Length	Width	Thickness
2,500	1,250	16 19
5,040	2,580	16 19

LivingBoard P5

Formaldehyde-free glued particleboard, type P5 in accordance with EN 312, suitable for load-bearing purposes in damp areas.

AREAS OF APPLICATION

Pure nature for greater quality of life: As a recommended ecological construction product for healthy living, LivingBoard P5 is the first choice in ecological timber construction. An all-round panel that keeps its promises.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in humid conditions
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	Refer to price list for minimum order quantities. Other formats and thicknesses on request.

FORMAT IN MM

(OVERALL DIMENSIONS INCL. TONGUE) THICKNESS / PIECES PER PACKAGE

Length	Width	13	16	19	22	25
2,510	635	60	50	40	35	32

LivingBoard P7

Wood particleboard type P7 in accordance with EN 312, heavy-duty, for structural purposes for use in humid conditions, unfaced and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

The heavy-duty one: The LivingBoard P7 board is particularly suitable for load-bearing purposes. Developed for ecological timber construction, it is characterized by the best building biology and building ecology properties.

PRODUCT FEATURES

Product-type	P7
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Heavy duty load-bearing boards for use in humid conditions.
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	From a minimum order quantity of 70 m³. Other formats and thicknesses available on request.

FORMAT IN MM

Length	Width	Thickness
2,500	1,250	16 19
5,040	2,580	16 19

PremiumBoard Vapor P5

Wood particleboard Type P5 in accordance with EN 312, for load-bearing boards for use in humid conditions and with increased water vapour diffusion resistance.

AREAS OF APPLICATION

This moisture resistant particleboard is characterised by its extra-high water vapour diffusion resistance and particular airtightness. It is ideally suitable for internal sheathing of external walls and roof structures for diffusion-open timber construction designs.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in humid conditions
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.
Minimum quantity	Refer to price list for minimum order quantities. Other formats and thicknesses on request.

FORMAT IN MM

STORAGE TECHNOLOGY

High-performance design to withstand the tough everyday challenges in the logistics area. Solid, durable high bay racking with a high load-bearing capacity is an important factor for successful and productive warehouse management. Pfleiderer offers exceptionally robust wood-based materials that are easy to work with and allows their efficient construction in the required quality. Shelves, platforms, staircases and raised floors have to withstand a lot in everyday logistics. Pfleiderer ensures, with the right wood-based panels, that storage technology can be implemented quickly, economically and in accordance with all valid stipulations and regulations.

PremiumBoard P4

Wood particleboard type P4 in accordance with EN 312, for structural purposes for use in dry conditions.

AREAS OF APPLICATION

Doors

Storage
technology

Raised floor

PremiumBoard P4 is a urea resin bonded wood-based panel for load-bearing use, especially in dry conditions. Due to the bonding with amino resins, PremiumBoard P4 is a particularly light-coloured wood-based panel, which not only has a high load-bearing capacity, but also has above-average durability. With these properties, PremiumBoard P4 is the ideal material for modern shelves and racking, platforms and raised access floors.

5,600	2,100	30 38

PremiumBoard P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes for use in humid conditions.

AREAS OF APPLICATION

Due to the bonding with melamine-reinforced urea resin, PremiumBoard P5 is resistant to high humidity and temporarily higher moisture exposure. In addition to its structural function, PremiumBoard P5 also has above-average durability. With these properties, PremiumBoard P5 is the ideal material for modern shelving, platforms and raised access floors.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

PremiumBoard Pyroex P4

Wood particleboard type P4 in accordance with EN 312, for structural purposes for use in dry conditions, flame resistant.

AREAS OF APPLICATION

PremiumBoard Pyroex P4 is a flame resistant wood-based panel (construction class B1 to DIN 4102) with classification B- s2,d0 in accordance with EN 13501-1. PremiumBoard Pyroex P4 combines all the advantages of a structural particleboard with additional safety in case of fire. By adding flame retardants, the burn-through rate of the raw particleboards is reduced, as a result of which, the full development of the fire is delayed and in certain circumstances a fire is even prevented.

PRODUCT FEATURES

Product-type	P4
Reaction to fire	Flame retardant B-s2,d0 (EN 13501-1)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in dry conditions.
Formaldehyde emission class	E1 E05
Note	FSC certification or PEFC certification available on request.

DecoBoard P4

Wood particleboard type P4 in accordance with EN 312, for structural purposes, for use in dry conditions, melamine faced on both sides.

AREAS OF APPLICATION

DecoBoard P4 is a urea resin-bonded wood-based panel, faced on both sides, for structural use, especially in dry conditions. It combines high load-carrying capacity and above-average durability with the advantages of an optimised facing. Ideally suitable for shelving and racking, in combination with the skidproof texture and particular product lay-up, DecoBoard P4 achieves slip resistance rating R10 and abrasion resistance class AC4 on its top face. The white coated back also improves light conditions significantly.

PRODUCT FEATURES

Product standard	EN 14322
Core material	PremiumBoard P4 Wood particleboard type P4 in accordance with EN 312, for structural purposes for use in dry conditions.
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in dry conditions.
Formaldehyde emission class	E1 E05
Antimicrobial effect	Surface with antimicrobial effect in 24 h for interior fit-out and finishes – Test Methodology JIS Z 2801 / ISO 22196
Note	FSC certification or PEFC certification available on request.
Minimum quantity	From a minimum order quantity of 100 m³. Other formats and thicknesses available on request.

Core material	PremiumBoard P6 Plus Wood particleboard type P6 in accordance with EN 312, heavy-duty, for structural purposes for use in dry conditions.
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
EC scope	EN 13986:2004 +A1:2015 Heavy duty load-bearing boards for use in dry conditions.
Formaldehyde emission class	E1 E05
Antimicrobial effect	Surface with antimicrobial effect in 24 h for interior fit-out and finishes – Test Methodology JIS Z 2801 / ISO 22196
Note	FSC certification or PEFC certification available on request.
Minimum quantity	From a minimum order quantity of 100 m³. Other formats and thicknesses available on request.

FORMAT IN MM

Length	Width	Thickness
5,310	2,100	38
5,600	2,100	38

Wood particleboard type P4 in accordance with EN 312, for structural purposes for use in dry conditions, melamine faced on both sides, flame retardant.

AREAS OF APPLICATION

DecoBoard Pyroex P4 combines all the advantages of a structural particleboard with additional safety in case of fire. By adding flame retardants, the burn-through rate of the raw particleboards is reduced, as a result of which, the full development of the fire is delayed and in certain circumstances a fire is even prevented. Ideally suitable for shelving and racking, in combination with the skidproof texture and particular product lay-up, DecoBoard Pyroex P4 achieves slip resistance rating R10 and abrasion resistance class AC4 on its top face.

PRODUCT FEATURES

Product standard	EN 14322
Core material	PremiumBoard Pyroex P4 Wood particleboard type P4 in accordance with EN 312, for structural purposes for use in dry conditions, flame resistant.
Reaction to fire	Flame retardant Bfl-s1, B-s1,d0 (EN 13501-1)
EC scope	EN 13986:2004 +A1:2015 Load-bearing boards for use in dry conditions.

CONCRETE FORMWORK

The best that can happen to concrete

Concrete formwork material is extremely challenging – in terms of strength, moisture resistance and surface quality. Our wood-based panels prove themselves to be trend-setting under the toughest processing conditions and if necessary, ensure the optimum appearance of the construction elements, where high-quality exposed concrete surfaces are required.

CONCRETE FORMWORK
MELAMINE FACED BOARDS

FormBoard P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, melamine faced on both sides.

AREAS OF APPLICATION

Due to the moisture-resistant bonding, FormBoard P5 is ideally suitable for multiple use in formwork construction. Special impregnation of the facing, with a film weight of approx. 160 g per side, ensures that the curing performance of the concrete is not influenced and an optimum result is achieved.

PRODUCT FEATURES

Low swelling /
moisture
resistant

Load-bearing

Direction-free

FormBoard P7 S

Wood particleboard type P7 in accordance with EN 312, heavy-duty, for structural purposes, for use in humid conditions, melamine faced on both sides.

AREAS OF APPLICATION

Due to the moisture-resistant bonding, FormBoard P7 S is ideally suitable for multiple use in formwork construction. Special impregnation of the facing, with a film weight of approx. 320 g per side, ensures that the curing performance of the concrete is not influenced and an optimum result is achieved.

PRODUCT FEATURES

Product standard	EN 14322

LivingBoard P5

Formaldehyde-free glued particleboard, type P5 in accordance with EN 312, suitable for load-bearing purposes in damp areas.

AREAS OF APPLICATION

With its fine and sanded top layer, LivingBoard P5 is ideal for use as formlining. Due to the moisture-resistant PU bonding and low swelling values, LivingBoard P5 can be used reliably in a damp environment.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

LivingBoard P7

Wood particleboard type P7 in accordance with EN 312, heavy-duty, for structural purposes for use in humid conditions, unfaced and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

The heavy-duty solution: LivingBoard P7 is particularly suitable for applications in which high load-carrying capacity is required. Due to the moisture-resistant PU bonding and the low swelling values, combined with the fine, sanded top layer, LivingBoard P7 is particularly suitable as load-bearing formlining.

PRODUCT FEATURES

Product-type	P7
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

LivingBoard face contiprotect P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

LivingBoard face P5 (sanded board) and LivingBoard face contiprotect P5 (unsanded board) are suitable for all areas of use, in which high load bearing values, moisture resistance and simultaneous formaldehyde-free bonding are important. Both types of board are ideally suitable as absorbent formlining and for stiffening the formwork structure. LivingBoard face contiprotect P5 with its unsanded contiprotect surface offers significantly delayed moisture absorption.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

PremiumBoard MFP Living P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

From the concrete formwork to wall sheathing through to the floor construction: The multi-functional board is suitable for all kinds of different applications. It unites strength values and moisture resistance with stability, load-carrying capacity and a decorative look. PremiumBoard MFP Living P5 can be used non-directionally (in any direction), as it has the same strength values in the transverse and longitudinal direction.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

PremiumBoard P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes for use in humid conditions.

AREAS OF APPLICATION

By bonding with melamine-reinforced urea resin, PremiumBoard P5 is resistant to high humidity and temporarily higher moisture exposure. In addition to its load-bearing function, PremiumBoard P5 also has above-average stability. These properties make PremiumBoard P5 ideal for formwork.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

PremiumBoard P7 S

Wood particleboard type P7 in accordance with EN 312, heavy-duty for structural purposes for use in humid conditions.

AREAS OF APPLICATION

PremiumBoard P7 S is highly resilient and features high moisture resistance with particularly low swelling values. The sanded, fine-grained surface, moisture-resistant gluing and the ability to be used in any direction make PremiumBoard P7 S the ideal solution for demanding formwork.

PRODUCT FEATURES

Product-type	P7
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)

PACKAGING CONSTRUCTION

So that everything gets from A to B safely
Valuable cargo must be well-protected against impact, moisture and temperature fluctuations. With our packing construction panels, we offer flexibly usable, robust, moisture-resistant and internationally approved solutions.

PACKAGING CONSTRUCTION PARTICLEBOARDS

PremiumBoard MFP Living P5

Wood particleboard type P5 in accordance with EN 312, for structural purposes, for use in humid conditions, uncoated and 100 % formaldehyde-free bonding.

AREAS OF APPLICATION

PremiumBoard MFP Living P5 is ideally suitable for packaging purposes and has the ideal prerequisites: stability, load-carrying capacity and moisture resistance. Packing crates made of PremiumBoard MFP P5 are also suitable, for example, for the storage of dry food. PremiumBoard MFP P5 can be labelled to the IPPC standard ISPM No. 15 for export overseas.

PRODUCT FEATURES

Product-type	P5
Reaction to fire	D-s2,d0 conforming to EN 13986 dependent on end use (Thickness: ≥ 9 mm / Gross density: ≥ 600 kg/m³)
