

The new Duropal XTreme plus: Super matt becomes easy to clean!

Neumarkt, January 2025 - Particularly robust and easy to clean, easy to maintain and with an anti-fingerprint effect: Pfleiderer has been offering application-oriented wood-based materials and high-pressure laminates with practical additional benefits for furniture and interior design with the XTreme product family since 2018.

Duropal XTreme plus, the premium product for heavy-duty horizontal surfaces, has now been further developed - cleaning and maintaining the surface is now even easier. The special highlight: the surface of Duropal XTreme plus is now oleophobic.

Evolution for planners, fabricators and users

The new range has a number of innovations in store for architects and planners, fabricators and end users. "Anyone who plans and designs furniture and interior fittings can look forward to the new variety of our decor collection," explains Michael Schiebe, Sales Manager Retail and Contract Core West. "Fabricators can choose from the most suitable product variants for the realisation of their projects, from laminate to composite elements with P2, P3 and MDF coreboards, right through to worktops," Michael Schiebe continues. "And end customers enjoy the benefits of the special resilience and easy cleaning and care - for long and unrestricted enjoyment of the super-matt and elegant ambience."

In addition to its excellent durability, impact resistance and outstanding anti-fingerprint effect, Duropal XTreme plus is also particularly scratch-resistant, making it suitable for heavy-duty horizontal contact surfaces such as worktops, tables and counters. The product has now been further developed in terms of functionality. The surface of XTreme plus is now oleophobic, making it easier to remove cooking oils with a dry microfibre cloth. A damp microfibre cloth is sufficient for soiling such as juice, vinegar, beet or fingerprints. For grease such as butter or coffee and tea stains, a grease-dissolving all-purpose cleaner is sufficient.

New functionality and extended scope for design

In the new collection, XTreme plus is available from stock in an extended range - in new trendy decors and visually coordinated with the other products in the XTreme family. "Oils, dirt, germs, acids, sharp objects or abrasion - many interior surfaces have to withstand heavy use. At the same time, our customers expect a high-quality visual appearance with a consistent decor. Like Duropal XTreme plus, we continue to develop all of our practical and elegant XTreme products according to these standards," says Michael Schiebe, Sales Manager Retail and Contract Core West. "The exceptional surface quality meets the highest standards of hygiene, practicality, durability and user-friendliness."

The storage collection for Duropal XTreme plus has been expanded to 24 decors. Planners and users thus benefit from greater creative freedom for designs with a velvety-soft feel and matt, low-reflection surfaces.

Whether in areas with public traffic or in private homes, the hygienic properties of surfaces are becoming increasingly important. Duropal XTreme plus has a highly antibacterial and food-safe surface and meets the high hygiene requirements in public and private areas. It reduces 99% of all germs within one day in accordance with JIS Z 2801 / ISO 22196 and reduces the risk of people becoming infected with pathogens via the surfaces.
